THE SMARTER WAY TO SELECT HARDWARE

Instead of investigating hardware products in isolation, wouldn't it be simpler to see solutions that complement each other together?

We'd like to introduce **CHeSS**

We are **Norseal, Boss Door Controls, Strand Hardware, Access2** and **Cooke Brothers**

We've got window and door control, seals and security sorted. We're all experts in our sector, all setting the benchmark for excellent quality, and we're collaborating to make selecting and specifying hardware simpler.

You're invited to our roadshow

We're bringing everything and everybody together to make the best use of your time. You'll see a collection of outstanding architectural-hardware solutions. There's something for everyone: architect, specifier or locksmith, and we promise you a relaxed, friendly atmosphere.

Join us for great speakers

We're delighted to welcome DHF General Manager & Secretary and BSI committee member **Michael Skelding** who will be speaking at 18:30

Michael Skelding

Welcome to CHeSS

The new way of discovering hardware, security and seals.

Even our venue is chosen to inspire.

24/10/19 - 18:00 > 21:00
